Application/Control Number: 10/716,652

Art Unit: 1625

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 68, 69, 71 and 72 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Treating allergic, inflammatory or autoimmune disorders broadly is not enabled. The specific diseases must be recited. This is true even for claim 71 which depends on 68 and further recites that the above diseases are associated with lymphocyte and/or monocyte accumulation.

Claim 72 recites "a method of inhibiting leukocyte migration comprising administering a therapeutically effective amount of a compound of claim 44 to a mammal in need of such treatment". One of ordinary skill in the art would not know which disease states to treat.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 64 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. "2H-benzo[3,4-d]1,3-dioxolen-5-yl" is incorrect terminology. All occurrences should be changed to "2H-benzo[d]1,3-dioxolan-5-yl". See the attached

Application/Control Number: 10/716,652

Art Unit: 1625

print-out of a search in STN in the registry file. The name of the parent moiety was

searched.

Claims 44-63 and 65-67 are deemed allowable.

Claim 70 is objected to as being dependent upon a rejected base claim, but

would be allowable if rewritten in independent form including all of the limitations of the

base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Bernard Dentz whose telephone number is 571-272-

0683. The examiner can normally be reached on Mon-Fri from 8 to 4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Cecilia Tsang, can be reached on 571 272-0562. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
